

On the Subject of ❖ (Nonverbal Simon)

We've committed a cardinal sin - using words in a nonverbal setting.

This module has four different colored buttons.

Each color that flashes will correspond to a color to press.

This module has three to five stages. Each stage will flash a color following the colors from the previous stages. Press the colors in order from the first stage to the most recent stage.

Flashing Color	Color To Press
Orange (Left)	<ul style="list-style-type: none"> • If there are 0 or 1 batteries, press yellow. • If there are 2 or 3 batteries, press green. • If there are 4 or 5 batteries, press orange. • If there are 6 or more batteries, press red.
Red (Top)	<p>If the serial number has the following configuration: (# = number, X = letter)</p> <ul style="list-style-type: none"> • ###XX#, press green. • #X#XX#, press red. • XX#XX#, press orange. • X##XX#, press yellow. <p>If the serial number has neither of those configurations, red will never flash.</p>
Yellow (Right)	<ul style="list-style-type: none"> • If there are more unlit than lit indicators, press red. • If there are more lit than unlit indicators, press green. • If the amount of lit and unlit indicators are equal, press orange.
Green (Bottom)	<p>Follow the first rule that applies.</p> <ul style="list-style-type: none"> • If there is a serial port, press orange. • If there is a PS/2 port, press red. • If there is an RJ-45 port, press green. • Otherwise, press yellow.
